# When a typhoon or heavy rain is approaching

Is the area you live shown on the Hazard map / Inundation Risk Search Service in colors (\*)?

**Hazard map**

You can download from the city website with the number 1002434 or from the QR code below.

Is there a high place where you can escape to when water comes into your house?

Yes

No

Yes

**Stay home**  
(Evacuate if there is a cliff or like near your house that could cause a landslide.)

Escape to their house.

No

If someone in your family needs more time to escape, you all should evacuate at **【Alert Level 3】Evacuation of the Elderly etc.**

All people should immediately evacuate at **【Alert Level 4】Evacuation Instruction**

When in danger

Do you have any friend or an acquaintance who lives in a safe area?

Yes

No

Evacuate to the District Disaster Prevention Center (Municipal elementary and junior high schools, Kokubunji high school, Tokyo Keizai Univ.)

(\*) On the website, you can see the dangerous places due to increased water in the river and underground due to heavy rain. Latest information is available in Japanese. Inundation Risk Search Service is from here.
